

## Anti-vibration Mounting

## Type ESL

Multi-directional mount for compression, tension and shear loading

Art. No.	Type	Load in N on axes Z÷Z	A un-loaded	A max. load	B	C	D	E	ØF	H	J	K	L	N	X max.	Weight in kg

The max. load on X÷X axes is the double value from Z÷Z axes.

The max. load on Y÷Y axes is 20% from Z÷Z axes.

### Applications

For active and passive isolation of vibrations and maximum damping of solid-borne noise transmission in: weighbridges and scales, measuring systems, control equipment, rotary machinery such as compressors, refrigerating systems, blowers, pumps, mills, mixers, shock-absorbent buffers, etc.

For installation guidelines see

The elements must generally be installed in the same direction
