

ANTI-VIBRATION MOUNTING TYPE ESL

Multi-directional mount
for compression, tension
and shear loading

Art. No.	Type	Load in N on axes Z-Z	A un- loaded	A max. load	B	C	D	E	ØF	H	J	K	L	N	X max.	Weight in kg

The max. load on X-X axes is the double value from Z-Z axes.

The max. load on Y-Y axes is 20% from Z-Z axes.

Applications

For active and passive isolation of vibrations and maximum damping of solid-borne noise transmission in: weighbridges and scales, measuring systems, control equipment, rotary machinery such as compressors, refrigerating systems, blowers, pumps, mills, mixers, shock-absorbent buffers, etc.

For installation guidelines see →

The elements must generally be installed in the same direction
